Press Release

nvisionist and the innovative nvbird® bird detection & monitoring system have been awarded in three major categories at the annual Impact BITE Awards 2021.

nvisionist and the innovative **nvbird® bird detection & monitoring** system have been awarded in three major categories at the annual Impact BITE Awards 2021. In the 10th anniversary of Impact BITE Awards 2021, which took place on Monday 27 of September, nvisionist and nvbird® were among the big winners, as they were distinguished with 1 Platinum and 2 Gold awards in the following categories:

- **Platinum Award**

nvisionist and nvbird® - Bird Detection & Monitoring System, have been awarded as the project that received **the highest overall rating** from the judges.

- **Gold Award**

In the Section 2- “Specialized industry applications”, nvisionist and nvbird - Bird Detection & Monitoring System have received the top award in the field of “Energy”.

- **Gold Award**

In Section 3-“New Technology Trends in applications and services”, nvisionist and nvbird - Bird Detection & Monitoring System were honored with the top award in the “**Artificial Intelligence**” category.

The triple distinction of nvisionist and nvbird, is a strong confirmation that our digital & technology solutions can compete at global level and create added business value in the field of Energy and Environment.

The awards were received by **Mr Tassos Alefantos** and **Mr Vassilis Orfanos**.

"Today's awards belong to the whole family of nvisionist. It is a great honor and we are grateful, that our effort and perseverance have been recognized. **nvbird is the result of intensive research and deep know-how in ICT**; more importantly is the result of continuous effort to understand and address the business needs and strategy of wind energy players" noted Mr. Tassos Alefantos, CEO of nvisionist. The Special Adviser, **Mr. Vassilis Orfanos**, among other things noted that "... As a Spanish poet says, **“Traveler, there is no path. The path is made by walking”**". This is how we have learned to work at nvisionist, innovating on a global scale, and creating high added value for all. This is the philosophy on which we will continue working. "

nvbird® is a pioneering, integrated solution that is at the forefront of global technology with application in Wind Energy and with significant benefits for the environment.

It is installed in wind farms for bird monitoring and incorporates state-of-the-art hardware, software as well as Artificial Intelligence & Machine Learning platforms. It is based on a unique algorithms to detect and recognizes with unprecedented accuracy birds that fly dangerously near the wind turbines, analyzes their flight path, activates speakers with special sounds to deter them and in case they do not fly away it stops the wind turbine to allow a safe passage for the birds .

nvisionist is an innovative high-tech start-up that specializes in applied digital technology solutions, based on Artificial Intelligence (AI) and Machine learning. **Nvisionist S.A. designs, creates, and offers innovative solutions and services for the renewable energy sector that benefit organisations, communities and the environment and contribute to the quality of life and conservation of resources.**

nvisionist is a member of ELETAEN (Hellenic Scientific Association of Wind Energy), a member of Wind Europe, as well as a member of SEPE (Association of Information Technology & Communications of Greece).
